Senior Front End Developer

Description

We are looking for a Senior Front End Developer to join our team and help us build the next generation of user interfaces. In this role, you will be responsible for designing, developing, and implementing high-quality, user-friendly interfaces for our products.

Roles and Responsibilities

1. Design, develop, and implement high-quality, user-friendly interfaces
2. Work closely with other members of the team to ensure that our interfaces are aligned with our business goals and meet the needs of our users
3. Stay current with industry trends and best practices in front end development.
4. Collaborate with other teams to ensure that our interfaces are integrated with other systems and components

Skills and requirements

1. 3+ Years of experience in UI development.
2. Strong understanding of HTML, CSS, JavaScript and WordPress.
3. Experience with React will be considered an added advantage.
4. Experience with user interface design principles and best practices.
5. Ability to work independently and as part of a team.
6. Maintain high standards of code quality and ensure compliance with industry best practices.
7. Excellent problem-solving skills and attention to detail.
8. Strong communication and collaboration skills.
