## Senior JS Full Stack Developer (MERN/PHP)

### Description

We are seeking a highly skilled and experienced Senior Full Stack Developer to join our dynamic digital agency. The ideal candidate will be a versatile and innovative developer with a strong background in both frontend and backend web development, particularly excelling in advanced JavaScript and related technologies. This role requires a deep understanding of web development principles and the ability to lead complex projects while mentoring junior team members.

### Responsibilities:

- 1.Design, develop, and maintain scalable web applications using the latest technologies.
- 2.Implement and manage both frontend and backend components, ensuring they are efficient, secure, and well-documented.
- 3.Collaborate with designers and other developers to deliver high-quality, user-friendly websites that meet client requirements.
- 4.Write clean, efficient, and well-organized code, adhering to best practices and coding standards.
- 5.Participate in code reviews and provide constructive feedback to peers to maintain code quality.
- 6.Stay current with emerging technologies and industry trends to continuously improve our development processes.
- 7.Mentor junior full stack developers, fostering their growth and development.
- 8.Work closely with project managers to understand project requirements and ensure timely delivery.

### Qualifications:

- 1.Education: Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent work experience).
- 2.Experience: 3+ years of full stack development experience, with a focus on web technologies.

### Technical Skills:

- 1.Proficient in HTML5, CSS3, and JavaScript (including advanced features like ES6+, async/await, etc.).
  - 2.Experience with frontend frameworks such as React, Angular, or Vue.js.
  - 3.Strong backend development skills in at least one language (e.g., Node.js, Python, PHP.).
  - 4.Experience with databases (SQL and/or NoSQL) and ORM libraries.
  - 5.Familiarity with RESTful APIs and web services.
  - 6.Understanding of web server configuration and deployment, preferably on cloud platforms.
  - 7.Proficiency in version control systems, preferably Git.
- Knowledge of testing frameworks and methodologies.
