Senior PHP Developer (02 – 03 Years)

Description
We are looking for a talented Senior PHP Developer to join our dynamic team. The ideal candidate will be passionate about web development, experienced with Laravel and PHP, and eager to stay current with the latest industry trends and technologies.

Roles and Responsibilities
1. Design, develop, and maintain complex web applications and software solutions using PHP and the Laravel framework.
2. Exhibit a strong understanding of OOP concepts and MVC architecture.
3. Collaborate closely with the front-end development team to integrate new features into the application.
4. Mentor junior developers and actively engage in code reviews to ensure high code quality and adherence to best practices.
5. Keep up-to-date with emerging trends and technologies in software development to continuously enhance our development processes and technologies.

Skills and requirements
1. 2+ years of experience as a Laravel Developer or similar role.
2. Strong proficiency in React Js and WordPress.
3. Proficient in using Git for version control and collaboration with other developers.
4. Knowledge in RESTful API development.
5. Strong problem-solving skills and a critical mindset.
6. Excellent analytical and problem-solving skills.
